

Multi-camera video recording with overlay | Live video and audio streaming

Recording your next big marine research discovery or survey is made possible with the SubC DVR with Overlay. This high-performance system is supported by powerful software that allows for unrivalled subsea video recording, annotation, and streaming.

Multi-Camera Input

The system can support up to six camera channels, each with an input and output, that can manage composite, 4K, HD, IP, and SD video cameras.

Intuitive & Easy to Use

This highly versatile system is intuitive to use and can be operational in less than an hour.

Overlay Capability

Elevate and add value to your research and survey findings by including dynamic graphical overlays such as depth, altimeter and headings to your videos.

Built-in Storage & Logging

Record and blackbox all of your camera feeds, preserving your video and data; Data-logging with time-synced events operates as a dive log.

Compatible with Aize Integrity Elements

Streamline the project management of your ROV inspections and underwater surveys with Aize Integrity Elements integration.

Coming Soon

- Built-in secure real-time video streaming
- Playback functionality of dive log
- Budget-friendly SubC DVR software license options
- Camera controls for zoom, focus, and exposure

All-in-One System

Choose our all-in-one Subsea 4K and HD Video Survey system to manage complex ROV inspections and surveys effortlessly.

We've designed this subsea imaging system to reduce complexity by combining all video management functions into one suite.

Subsea 4K and HD Video Survey

What you'll get:

- High-quality cameras providing uncompromising 4K and HD video and imaging
- Digital Video Recorder with Overlay (DVR+O) to record, log data, and more
- LEDs and lasers for superior footage that is captured with precision
- Comprehensive remote training and end-to-end support

This complete system provides you with all of the software and hardware required for an effective subsea inspection without all the cost.

SubC is here to help you plan your next project.
